

Profile

I'm passionate about developing websites that work seamlessly and look beautiful.

Based in Juneau, Alaska, I help clients in a wide variety of industries turn their ideas into websites that represent them. My graphic design background means your web presence won't just function beautifully – it will look good, too.

I'm currently available for short- and long-term web development projects, either working alone or as part of your team. I look forward to new challenges that push me to explore creative and innovative designs and solutions.

Experience

GRAPHIC AND WEB DESIGNER, SELF-EMPLOYED, 2010-PRESENT

I design print collateral and websites to help clients develop new and existing brands. Notable contracts include:

BARANOF FISHING, 2011-PRESENT

In 2011, I created the initial website for Baranof Fishing and The Alaska Fish House using HTML, CSS, JavaScript, and ColdFusion. In 2016, I combined multiple sites into one, using Laravel Frameworks, SASS, CSS, HTML, and JavaScript.

INTERNATIONAL STUDENT EXCHANGE, 2010-2016

I created, managed, and maintained all company websites and created branding for all marketing materials, including brochures, flyers, ads, e-mail bursts, and all individual company websites.

COASTAL REAL ESTATE GROUP, 2011-2016

I helped grow Coastal Real Estate Group from a start-up company to the number-one real estate agency in Ketchikan; created their logo, business cards, and marketing materials; and built website using CSS, JavaScript, and PHP, powered by the national MLS database.

SENIOR GRAPHICS & WEB DESIGNER, DYNATRONICS CORP. SALT LAKE CITY, UTAH, 2000-2010

As lead designer, I managed a small team of designers. My responsibilities were to create all company marketing materials and collateral, including the company's catalog, ads, e-mail blasts, and website. Other duties included creating faceplates for new machines and equipment.

Education

Utah State University, Bachelor's Degree
Snow College, Associate's Degree

DevMountain, 12-week web development coding bootcamp

Lyndia.com and Laracast Online Tutorials

Skills

The technology industry is constantly changing. I pride myself in keeping up with the most recent design standards. My skills include HTML5 + CSS3, AngularJS, Laravel, JavaScript, Photoshop, Illustrator, and WordPress.

References

"Her knowledge of both front and back-end design is invaluable when it comes to project designs, as she keeps both perspectives in mind and can limit the amount of redesign on the UI for long projects."

Josh Rahl, Owner, EXIT Group (client for more than 8 years)

"I have been extremely pleased with the quality and quantity of work Jeimi has produced. She has a great attention to detail, works in a collaborative fashion, and interacts well with a broad range of staff in our organization. She is innovative, offers well-thought-out ideas, and will quickly adjust a design to meet ever-changing needs."

Paul McLaughlin, Chief Operating Officer, International Student Exchange
